FIELD OF INTEREST

In the course of 4 years, I have come to recognise my inclinations and strengths in visual design.

I have found my niche in **Illustration**, **brand identity** and **packaging** which is what I am looking to explore more in my job.

HARD SKILLS

I am well-versed with the Adobe suite (Illustrator, Photoshop), Indesign, figma and procreate.

SOFT SKILLS

I grow in a collaborative environment, bringing a keen eye for detail. I'm a fast learner who embraces challenges and thrives on bringing diverse perspectives together to make artistic visions a reality.

ABOUT ME

Hi! I am a graphic designer and illustrator from Ecole Intuit Lab, Mumbai. I have a quirky, bold, and experimental style that is vividly reflected in my work. Drawing inspiration from experiences, I have a deep passion for illustration, branding, and packaging.

My love for food and travel fuels my eagerness to explore new and risky design styles. I aspire to craft designs that not only set me apart from other designers but also make a significant impact on those who engage with them.

EXPERIENCE

Design Intern

Yellow Creative AD - 2023 June - Nov

During my five-month internship at Yellow Creative Ad, I experienced significant professional and personal growth. Engaging in diverse projects, I contributed to team-based brand identity projects and independently led a website design project.

This experience enhanced my collaboration and project management skills. I excelled in presenting comprehensive proposals to clients, honing my ability to communicate effectively and pitch projects within tight deadlines.

Design Intern

ADI - Assosiation of Designers of India - 2022 June - Aug

At ADI, I got the opportunity to work as a team with professionals who were the best at what they do where I worked on the brand identity for a Design fest, handled social media for the same, got an opportunity to be a part of group ideation and discussions and socialised and built networks with like-minded professionals from the industry.
