About me

A keen learner, always looking for opportunities to widen my design knowledge and skill set.

The end goal of most of my work is to create a visual treat, illustration being one of my preferred medium.

Trying to have a fresh approach and exploring new directions every single time is a core part of my process as a designer.

Experience

2 month internship at Heta Bhuta & Co.

During my time at HB and Co, I explored various aspects of graphic design.

This included publication related tasks, packaging, creating social media adapts, and curating event stationery, among others.

My key gains include better software efficiency, a quick flow of ideas, and improved pace in producing designs

Education

2024 (current)

Under graduation
Visual Communication design
Ecole Intuit Lab,
